

Personal Information

We do not collect any personally identifiable information.

Analytics logs

Like most standard apps we use statistic packages such as Google Analytics for Firebase to analyze trends in how our app is utilized. Information monitored includes geographic location of users, device type, actions taken in the app and other statistics. This information is anonymous and cannot be directly linked to individual users. We may use it to identify high-use or low-use areas of the app, pinpoint problem areas, analyze broad demographic trends in our users, and make decisions about how to make it easier for people to use our app.

Contact Information
